12/9/95

Dear Ray,

The neat transcript of Mailer's mouthings came day before yesterday and yesterday your copy of the cover of the disks came. Both are very helpful and thanks for them.

I do not want to take the time to listen to it all, thanks, so do not bother to mail the disks.

What you sent is enough for my purposes, as you'll see.

While which side of which disk he said this on could be a nice little touch, it also is not necessary.

Sorry you got ripped off on the small name tag but again thanks for it.

If you saw the weather predictions on TV they begin accurately for us.

I fear we may be snowed in for a while.

As the TV sketch outlined where how much snow would fall we are between where the predictions are from 3-5 to 6 inches and from 6 to 12.

But as long as the electric lines stay up we should be OK.

I'd hoped to find Random House saying something on the cover I can use and they do: "...a nonfiction masterpiece."

Again many thanks,

Harold
